- Industrial grade

Features :-

- Cling Wrap film's overriding brand benefit and promise is freshness
- Useful for wrapping a variety of cooked food, fruits, vegetables, dairy products, sweets, meat, seafood and a whole lot more
- It preserves the moisture and aroma in foods wrapped in it and keeps cooked food, fruits and vegetables fresh and juicy
- Cling Wrap ensures lock tight freshness

- Cling Wrap is a food grade, self-sealing, stretchable and hygienic freshness film for domestic as well as institutional applications
- High rate O₂ and CO₂ transmission and excellent moisture retention
- Glossy and clear
- Fog-repellent and able to break up water drops to maintain good clarity.
- Cold-resistant and keeping soft even under refrigeration.
- Suitable for both hand and mechanic wrapping due to adequate adhesiveness and elongation.

Applications :-

For wrapping foods such as vegetable, fruit, meat, biscuit, etc. High clarity, puncture resistance, good elasticity Plastic food packaging film, widely known as cling film, has literally revolutionised the food industry. The need to keep food fresh and attractive looking, and also to allow quick visual identification, has led to the development of innovative cling films. This film finds domestic as well as institutional applications.
